

T11 Seamless Boiler Tubes Industries Asme Sa192 Sa210 A312 Uns S31254

Our Product Introduction

for more products please visit us on seamless-steeltube.com

Basic Information

Product Specification

- Product Name: Medium And Low Pressure Boiler Tube
- Material: Carbon Steel, Stainless Steel, Etc
- Surface: Oiled/black Painting
- Outer Diameter: 10.3mm - 610mm
- Thickness: 1.24mm - 60mm
- Section Shape: Round, Square, Or Other Special Shape
- Technique: Hot Rolled
- Application: Medium And Low Pressure Boilers
- Highlight: **t11 boiler tube, asme sa192, asme sa210**

Product Description

Medium And Low Pressure Boilers/Carbon Steel Seamless Pipe/Seamless Steel Pipe Hot Rolled

Specifications

Product name	medium and low pressure boilers/carbon steel seamless pipe/Seamless steel pipe hot rolled
Thickness	1.24mm - 60mm
Diameter	10.3mm - 610mm
Standard	ASTM A519 GRADE 4130
Material	GRADE 4130
Surface	Oiled/black painting
Packing	wooden bag, pallet or as per your request
Application	Petroleum, chemical, machinery, electric power, shipbuilding, papermaking, construction, etc
Port of delivery	Shanghai port or Tianjin port
Payment term	T/T or L/C
Certificate	ISO 9001
Lead time	30days or according to your qty
MOQ	5~6tons each size
type	seamless
Technique	Cold drawn
Inspection	Acceptable
Price term	FOB, CIF or CFR

Characteristics of Seamless Boiler Tubes:

High-Temperature Resistance: Seamless boiler tubes are manufactured from materials that can withstand high temperatures generated in boiler systems. Common materials used for seamless boiler tubes include carbon steel, alloy steel, and stainless steel. These materials offer excellent heat resistance, ensuring the tubes can handle the extreme temperatures and thermal stresses associated with boiler operations.

Seamless Construction: Seamless boiler tubes are produced using a seamless manufacturing process, which involves heating a solid steel billet and then piercing it to form a hollow tube. This seamless construction eliminates the presence of welds or joints, which can be potential weak points in the tube. The absence of welds enhances the strength and integrity of the tubes, making them more reliable in high-pressure and high-temperature environments.

Corrosion Resistance: Seamless boiler tubes are often made from materials with good corrosion resistance properties. Stainless steel and certain alloy steels, such as chrome-molybdenum (chrome-moly) steel, offer excellent resistance to corrosion and oxidation at elevated temperatures. This corrosion resistance helps to maintain the integrity of the tubes, ensuring long-term reliability and minimizing the risk of failure or leaks.

Dimensional Precision: Seamless boiler tubes are manufactured with precise dimensions to meet the requirements of boiler systems. They are available in various sizes, diameters, and thicknesses, allowing for customization to specific project needs. The dimensional precision of the tubes ensures proper fit and compatibility with boiler components and facilitates effective heat transfer.

High Pressure Resistance: Seamless boiler tubes are designed to withstand high-pressure conditions commonly found in boiler systems. They are engineered to handle the internal pressures generated by the steam or fluid circulating within the boiler. The tubes' strength and durability enable them to withstand the stress and pressure without deformation or failure, ensuring safe and efficient operation.

FAQ

Q1. Are you a manufacturer or trader?

We are a manufacturer, and we can have our own factory produced many steel products.

Q2. Whether your company supports Trade Assurance order?

Yes, we can (100% product quality protection; 100% on-time shipment protection; 100% payment protection)

Q3. Can we get the some samples? Any charges?

Yes, you can get available samples in our stock. If the samples from new production, we will charge some reasonable cost, but this amount will be deducted from your first order.

Q4. How do we build up business relations with your company?

Send us your requirement which includes size, coating info, parameters, quantity, destination .

Q5. What is the MOQ?

We can accept small orders. Please feel free to contact us, we can meet your requirements.

Q6. What's your advantage?

With high-quality products and efficient customer service, we adhere to the principle of customer first.

Q7. How long is your delivery time?

Delivered within 15 days after receipt of deposit.
